PROFESSIONAL SUMMARY

Senior Full-Stack Developer and Software Architect with 10+ years of experience delivering robust enterprise platforms and ERP systems across front-end and back-end architectures. Advanced expertise in back-end engineering with C# and .NET Core, paired with deep front-end and server-side proficiency in TypeScript across modern browser environments (React) and Node.js runtimes. Demonstrated success implementing SOLID Principles, Clean Architecture, Domain-Driven Design (DDD), and Command Query Responsibility Segregation (CQRS) to build scalable, high-availability solutions utilizing Docker and Microsoft Azure. Proven track record directing the end-to-end software development lifecycle (SDLC) from architectural design through automated cloud deployment.

TECHNICAL SKILLS

- **Programming Languages:** C#, TypeScript, JavaScript, PHP, Kotlin, Java, C, C++, VB.NET
- **Architectures & Patterns:** Microservices, Clean Architecture, Domain-Driven Design (DDD), CQRS, SOLID Principles (SRP, OCP, LSP, ISP, DIP), N-Tier, MVVM, Zero-Allocation Architecture, Atomic Design
- **.NET Ecosystem:** .NET Framework, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, WCF, WPF, WinForms, P/Invoke, AutoMapper, MediatR, Mediator.SourceGenerator, Polly, FluentValidation, CommunityToolkit.Mvvm, Hangfire
- **Web & Frontend:** React, Vue, Angular, RxJS, Node.js, Bun, Laravel, HTML5, CSS3, Tailwind CSS, MUI, SASS, Bootstrap, jQuery, Vite.js, WebPack, Gulp.js, Hyperscript, i18next, History API
- **Backend & APIs:** RESTful API, gRPC, MassTransit, RabbitMQ, Ocelot (API Gateway), Swagger, JSON Web Token (JWT), Refit, JsonSchema.Net
- **Databases & Cache:** Microsoft SQL Server, PostgreSQL, MySQL, SQLite, MongoDB, Cassandra, Redis
- **Cloud, DevOps & Infrastructure:** Microsoft Azure (Virtual Machines, Storage, Functions, Blobs, File Share, Tables), Docker, MinIO, Heroku, Continuous Integration/Continuous Deployment (CI/CD), Git, GitHub, SVN, Microsoft IIS, Apache HTTP Server, Microsoft Server, Ubuntu Server, Serilog, ZLogger, OpenTelemetry, VirtualBox, Windows Kernel API, GitHub Pages
- **Testing & Quality Assurance (QA):** NUnit, xUnit, Moq, FluentAssertions, Testcontainers, coverlet.collector, Bogus, WireMock.Net, Karma, Jasmine, Vitest, TestCafe, ESLint, Prettier, Husky, Content Security Policy (CSP)
- **AI, Search & API Integration:** Claude, GPT, Gemini, YouTube API, GitHub Copilot, Ollama, OpenRouter, ElasticSearch, Lucene, MiniSearch, Chrome Extensions, Prompt Engineering, Context Engineering, Retrieval-Augmented Generation (RAG), AI Orchestration, Cline
- **Mobile & Desktop:** Flutter, Dart, Ionic, Android, Electron.js
- **CLI Tools:** System.CommandLine, Commander.js, JSONPath
- **Project Management:** Jira, Asana, Slack

PROFESSIONAL EXPERIENCE

Senior Software Developer and Software Architect - Freelancer - Istanbul, Turkey (Remote)

08/2025 – Present

- Architected and delivered full-stack .NET and React/Angular TS solutions with SOLID principles and Clean Architecture, CQRS, and DDD; migrated legacy monoliths to microservices, cut time-to-market by 39% and post-release defect density by 60%.
- Built AI-integrated frontend platforms using React + Vite/Vitest with RAG and an autonomous agentic layer, raising query result accuracy up to 95% while sustaining 85%–100% test coverage; extended reach via responsive browser extensions.
- Automated the complete software delivery lifecycle by establishing multi-stage CI/CD pipelines, containerization with Docker, reducing production deployment duration from 15 minutes down to 3 minutes / by 80%.

Senior Software Developer - HITIT BILGI TEKNOLOJILERI - Istanbul, Turkey (Hybrid)

01/2024 – 07/2025

- Engineered core enterprise modules and business logic for the flagship Enterprise Resource Planning (ERP) platform utilizing ASP.NET Core, ASP.NET MVC, WCF, and WinForms with DevExpress, boosting daily processing efficiency by 5%.
- Developed 3 interactive React.js front-end modules and 3 cross-platform Flutter mobile modules, consuming RESTful APIs to streamline operational workflows across the ERP platform.
- Contributed and Delivered modules spanning Stock Management, Order Management, Procurement Management, Shipment Management, Wholesale Sales Management, Retail Sales Management, Cost Management, and Production Management.

Senior Software Developer - Getron TR - Istanbul, Turkey (Remote)

01/2023 – 12/2023

- Built automated enterprise background processing engines and Windows Services in C# (.NET Framework/.NET) using plugin architecture, integrating Azure Blobs, File Share, Tables, and MS SQL for cloud-based persistence, increasing automated task throughput by 5%.
- Modernized legacy .NET Framework 4.6.2 applications to .NET 7 by refactoring legacy code, upgrading dependencies, and adopting dependency injection. Reduced recurring maintenance effort by ~10–15%, improved security through then-supported runtime patches, modern cryptography, and secure-by-default configurations, and 1.5–2x higher throughput in targeted benchmarks.

Full-Stack Engineer - Freelancer - Istanbul, Turkey (Remote)

04/2020 – 12/2022

- Built end-to-end web and desktop applications using C#, ASP.NET Core, MVC, WPF, and WinForms, transitioning legacy monolithic codebases into scalable Service-Oriented Architectures (SOA).
- Engineered Laravel/Lumen REST APIs on MySQL for mobile and Content Management System (CMS) backends—auth, profiles, push, in-app purchases, publishing, media, Role-Based Access Control (RBAC)—reducing average API response time by 20%.
- Designed optimized database schemas and relational indexes across MySQL and SQLite, reducing expensive table scans and improving query performance by 45%.

Software Developer Specialist - SETCARD - Istanbul, Turkey (On-Site)

08/2018 – 03/2020

- Contributed on a 9-person engineering team, maintained and optimized enterprise-scale Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), and Card Management System web applications using ASP.NET WebForms and DevExpress, resolving business-critical bottlenecks to ensure seamless transactional processing across card lifecycle, customer, and merchant operations.
- Authored and tuned 30+ MS SQL Server stored procedures for financial reporting on a prepaid card platform; implemented idempotent retry and restart logic for daily card load and batch jobs, significantly reducing manual recovery effort.
- Modernized a legacy ASP.NET WebForms financial dashboard by migrating to DevExpress Web Forms Controls, implementing server-side data binding and adaptive rendering for responsive cross-device access.

Full-Stack Developer - Freelancer - Istanbul, Turkey (Remote)

11/2017 – 07/2018

- Engineered full-stack web applications across the entire software development lifecycle (SDLC), delivering responsive, cross-browser compatible interfaces using JavaScript (ES6+), HTML5, and CSS3, with back-end services built on PHP, Laravel, and MySQL.
- Implemented automated cloud deployment pipelines using Microsoft Azure and Heroku, reducing manual software release turnaround time from 10 minutes to 3 minutes, a 70% reduction.

Software Developer - Verisun Bilisim - Istanbul, Turkey (On-Site)

09/2015 – 10/2017

- Designed and maintained full-stack web applications and client interfaces within a 8-member cross-functional engineering team, leveraging Git, Jira, and Asana to deliver 13 production applications from concept to release.
- Administered relational database lifecycles and web servers (IIS, Apache), implementing structured schema backups, disaster recovery strategies, and virtual machine configurations to ensure continuous availability.
- Delivered customer-focused technical solutions and architectural documentation, converting design specifications into scalable production code across 10 successful client application releases.

PROJECTS

Meeting System

- **Link:** https://github.com/ahmadmdabit/MeetingSystem
- **Technologies:** C#, .NET 9, ASP.NET Core, Clean Architecture, Entity Framework Core 9, SQL Server, Repository & Unit of Work Patterns, Angular 20, TypeScript, RxJS, JWT, Hangfire, MinIO, Docker Compose, Testcontainers, NUnit, Moq, FluentAssertions, Karma, Jasmine, Swagger/OpenAPI
- Architected a full-stack meeting system with a .NET 9 Clean Architecture (Api, Business, Context, Model) on EF Core 9 and SQL Server with Repository/Unit of Work, an Angular 20 standalone frontend using RxJS vm$ view models and JWT route guards; the entire stack in Docker Compose (single command) with Swagger/OpenAPI endpoints, health-check endpoints, and a Bogus-seeded dataset; tested with 96 NUnit/Testcontainers backend tests against a real SQL Server instance and 145 Karma/Jasmine frontend unit tests.

Notification System

- **Link:** https://github.com/ahmadmdabit/NotificationSystem
- **Technologies:** .NET 10, Clean Architecture, CQRS, DDD, Microservices, Ocelot API Gateway, ASP.NET Core MVC, Dapper, SQL Server, MassTransit, RabbitMQ, JWT, Docker, TUnit, ArchUnitNET, GitHub Actions
- Architected a .NET 10 microservices platform migrating an 8-project N-Tier solution to a 22-project multi-layer Clean Architecture with CQRS, DDD, and a shared kernel (DomainEvent, IRequest, IDomainEventDispatcher); diagnosed an exchange-naming defect silently discarding every RabbitMQ event, restoring 100% delivery via a real-broker integration guard.
- Enforced quality with 392 TUnit tests and 15 ArchUnitNET rules making architecture drift build-breaking; closed 2 Critical defects (DI dependency failure, redaction bypass) proven via mutation testing, shipped Dockerized non-root images via GitHub Actions CI/CD with a 0-warning Release build.

My Personal Website: Personal Website & AI Chat Assistant (RAG)

- **Link:** https://github.com/ahmadmdabit/ahmadmdabit.github.io
- **Technologies:** SOLID Principles, Atomic Design, React 19, TypeScript, MUI v7, React Router v7, i18next, puter.js, MiniSearch
- Built a bilingual (EN/TR) React 19 data-driven SPA featuring a client-side RAG engine on MiniSearch with dual-mode FAQ/cross-locale retrieval, a puter.js streaming AI assistant with automatic multi-model fallback across 20+ models, non-blocking context compaction at 75% of the active context window with exponential backoff, real provider token telemetry, lazy PII hydration, strict Content Security Policy (CSP), and a 3-tier system prompt that prevents LLM over-claiming.

EDUCATION

B.Sc. Electrical & Electronics Engineering (Computer Engineering)

- University of Aleppo - Faculty of Electrical and Electronics Engineering - Aleppo, Syria - 2014

CERTIFICATIONS

- **Microsoft Certified: Azure Data Engineer Associate - Microsoft** - 2025
  Reference: https://learn.microsoft.com/en-us/users/ahmetfatiholu-7655/credentials/9c26f4cb26082be7
- **CompTIA Certified: A+ – CompTIA** - 2010
  Reference: https://bit.ly/Certificate-APlus

LANGUAGES

- **Turkish** (Professional)
- **English** (Professional)
- **Arabic** (Native)
